MACROMOLECULES AS DRUGS AND AS CARRIERS FOR BIOLOGICALLY ACTIVE MATERIALS[a]

Editors and Conference Organizers

DAVID A. TIRRELL, L. GUY DONARUMA, and ANNE B. TUREK

CONTENTS

Introductory Remarks. *By* DAVID A. TIRRELL, L. GUY DONARUMA, and ANNE B. TUREK ix

Controlled Release from Macromolecules and from Macromolecular Matrices
Part I. Physical Release Mechanisms

Controlled Release and Magnetically Modulated Systems for Macromolecular Drugs. *By* ROBERT LANGER, RONALD SIEGEL, LARRY BROWN, KAM LEONG, JOSEPH KOST, and ELAZER EDELMAN 1
A New Simple Controlled Release Delivery System. *By* G. G. ALLAN, C. BALABAN, J. DUTKIEWICZ, A. W. W. LEE, and H. STRUSZCZYK 14
The Role of Cross-links, Entanglements, and Relaxations of the Macromolecular Carrier in the Diffusional Release of Biologically Active Materials: Conceptual and Scaling Relationships. *By* NIKOLAOS A. PEPPAS and STEVEN R. LUSTIG 26

Part II. Controlled Release via Polymer Degradation

Synthesis of Biodegradable Addition Polymers. *By* WILLIAM J. BAILEY and BENJAMIN GAPUD 42
Controlled Drug Release from Poly(ortho esters). *By* JORGE HELLER 51

[a] This volume is the result of a conference entitled Macromolecules as Drugs and as Carriers for Biologically Active Materials held from March 26 to March 28, 1984, by The New York Academy of Sciences.

Part III. Controlled Release of Polymer-Bound Agents

In Vitro and *In Vivo* Studies of Drug-Releasing Poly(amino acids). *By* JAMES M. ANDERSON 67
Controlled Activity Polymers with Pendent Metribuzin: Effect of Structure on Hydrolytic Release. *By* CHARLES L. MCCORMICK 76
Controlled Release of Drug Model from *N*-2-(Hydroxypropyl)methacrylamide Copolymers. *By* J. KOPEČEK, P. REJMANOVÁ, R. DUNCAN, and J. B. LLOYD 93

Soluble Macromolecular Drugs
Part IV. Antimicrobial Polymers

Synthetic Polymers as Drugs. *By* ANN CHRISTINE ALBERTSSON, L. GUY DONARUMA, and OTTO VOGL 105
Some Biologically Active Poly(thiosemicarbazides). *By* L. G. DONARUMA and R. J. WARNER 116
Biologically Active Organotin Polymers. *By* R. V. SUBRAMANIAN 134

Part V. Polyanions

Physical and Biological Properties of Cyclopolymers Related to DIVEMA ("Pyran Copolymer"). *By* GEORGE B. BUTLER, YE XING, GEORGE E. GIFFORD, and DAVID A. FLICK 149
Some Biologically Active Copolymers of Maleic Anhydride. *By* RAPHAEL M. OTTENBRITE and ALAN M. KAPLAN 160
Macrophage Activation and Antitumor Activity of Cyclohexyl-1,3-dioxepin and 4-Methyl-2-pentonyl Maleic Anhydride Copolymers. *By* ALAN M. KAPLAN, KRISTINE KUUS, and RAPHAEL M. OTTENBRITE 169

Part VI. Polypeptide and Polysaccharide Carriers

Computer Simulations of the Conformations of Catecholamine Derivatives. *By* MOISES HASSAN and MURRAY GOODMAN 185
Use of Polysaccharides as Drug Carriers: Dextran and Inulin Derivatives of Procainamide. *By* ETIENNE SCHACHT, LUC RUYS, JOAN VERMEERSCH, JEAN PAUL REMON, and RUTH DUNCAN 199
Antibodies as Carriers of Cancer Chemotherapeutic Agents. *By* T. GHOSE, A. H. BLAIR, P. UADIA, P. N. KULKARNI, A. GOUNDALKAR, M. MEZEI, and S. FERRONE 213
The Use of Immunotoxins Containing Ricin A or B Chains to Kill Neoplastic B cells. *By* ELLEN S. VITETTA and JONATHAN W. UHR 228

Part VII. Polymer-Biomembrane Interactions

pH Sensitization of Phospholipid Vesicles via Complexation with Synthetic Poly(carboxylic acid)s. *By* DAVID A. TIRRELL, DOREEN Y. TAKIGAWA, and KENJI SEKI 237

Interaction of Macromolecular Drugs with Beta-Adrenoceptors. *By* JOSEF PITHA and JOHN W. KUSIAK 249
Progress in Model Studies of Cellular Uptake. *By* F. RYPÁČEK, J. DROBNÍK, and J. KÁLAL 258

Liposomes as Carriers for Biologically Active Materials
Part VIII. Polymeric Liposomes

Polymeric Phospholipids as New Biomaterials. *By* JAMES A. HAYWARD, DAVID S. JOHNSTON, and DENNIS CHAPMAN 267
Preparation and Characterization of Polymerized Liposomes. *By* DAVID F. O'BRIEN, RICHARD T. KLINGBIEL, DONALD P. SPECHT, and PATRICIA N. TYMINSKI 282
Polymerized Phosphatidylcholine Vesicles as Drug Carriers. *By* STEVEN L. REGEN 296
Molecular Recognition, Catalysis, and Transport in Polymerized Surfactant Vesicles. *By* JANOS H. FENDLER 308

Part IX. Targeting Methods

Targeting of Liposomes to Accessible Cells *In Vivo*. *By* GREGORY GREGORIADIS, JUDITH SENIOR, BARBARA WOLFF, and CHRISTOPHER KIRBY 319
New Methodology for Liposome Targeting to Specific Cells. *By* DEMETRIOS PAPAHADJOPOULOS, TIMOTHY HEATH, KEITH BRAGMAN, and KATHERINE MATTHAY 341
Phospholipid Vesicle Targeting Using Synthetic Glycolipid and Other Determinants. *By* JOHN D. BALDESCHWIELER 349
Uptake and Intracellular Processing of Targeted and Nontargeted Liposomes by Rat Kupffer Cells *In Vivo* and *In Vitro*. *By* GERRIT L. SCHERPHOF, JAN DIJKSTRA, HALBE H. SPANJER, JOHANNES T. P. DERKSEN, and FRITS H. ROERDINK 368

Part X. Applications of Liposomal Carriers

Liposomes as Vectors for Calcium Ionophores. *By* GERALD WEISSMANN 385
Selective Toxicity and Enhanced Therapeutic Index of Liposomal Polyene Antibiotics in Systemic Fungal Infections. *By* R. L. JULIANO, G. LOPEZ-BERESTEIN, R. HOPFER, R. MEHTA, K. MEHTA, and K. MILLS 390
The Delivery of Phototoxic Drugs to Selected Cells. *By* SHRISHAILAM YEMUL, CAROLE BERGER, ALLISON ESTABROOK, RICHARD EDELSON, and HAGAN BAYLEY 403
Liposomes as Carriers of Antiarthritic Agents. *By* C. GRAHAM KNIGHT, DAVID R. BARD, and D. PETER PAGE THOMAS 415
Liposome-Embedded Iron Porphyrins as an Artificial Oxygen Carrier. *By* E. TSUCHIDA 429
Binding Characteristics of Antibody-Bearing Liposomes. *By* FRANCIS J. MARTIN and VIOLA T. KUNG 443
